TECHNOLOGY CENTER 2800

51. (New) A method for illuminating an object comprising:
providing an LED system that generates light of a range of colors within a color spectrum
in response to an activation signal;
directing the light toward an object; and
controlling the activation signal to vary the range of colors of the light over time,
whereby the object is affected with color-changing illumination.

52. (New) The method of claim 51 wherein the LED system includes at least one red LED,
and at least one blue LED, and at least one green LED.
